

# INVITATION

Where **METAL**  
comes alive

**AMB**  
Internationale  
Ausstellung für  
Metallbearbeitung  
15.-19.09.2026  
Messe Stuttgart

**HALL 7**

**BOOTH B22**

We look forward to seeing you!

**FEHLMANN**

Your Precision Advantage. 

AMB, one of the most important events for the international metalworking industry, will take place in Stuttgart from September 15 to 19, 2026.

Visit Fehlmann at **Booth B22 in Hall 7** and discover our latest precision machine tools, automation solutions, and innovations for modern manufacturing.

We look forward to your visit and to personally exchanging ideas with you.

See you soon in Stuttgart,  
**Your FEHLMANN Team**

## Fehlmann PICOMAX 550 PRO with space-saving pallet handling Erowa Robot Compact 80

- Precise, efficient and flexible
- 5-axis machining with torque drives
- High productivity in a compact footprint
- Controlled via FEHLMANN MCM™
- Pallet handling

## FEHLMANN Booth B22 | Hall 7 also presents the following highlights:

### High-performance 5-axis CNC machining with Fehlmann VERSA 745

- 5-axis machining of workpieces up to  $\varnothing$  500 mm
- Optimal accessibility and unobstructed view of the work area
- High rigidity, thermal stability, and excellent vibration damping
- Automation can be retrofitted at any time
- Latest control technology HEIDENHAIN TNC7

Practical solutions for the flexible production of single parts and small series, as well as for modern training:

### The NEW generation of the PICOMAX 56 / 56L mill and TOP with Heidenhain control from the TNC7 family

At AMB 2026, we will present the latest generation of the PICOMAX 56 mill - a conventional and CNC milling machine in one.

#### FEHLMANN mill-functions:

With three handwheels and integrated software functions for simple drilling, tapping, and milling operations - the ideal replacement for conventional milling machines.

The **new generation** is equipped with a CNC control from the **HEIDENHAIN TNC7 family**, opening up additional possibilities for programming, simulation, and visualization.

### PICOMAX 21-M

With feed table - fast, safe and precise

- Approach bolt hole circles, dot patterns and rectangular pockets quickly and precisely - not only manually, but also automatically
- Digital display with touchscreen
